Professional Summary

Product Manager with 4+ years of experience delivering SaaS and data-driven platforms across Biotech, AI, Sustainability, IoT, and Government-backed ecosystems. Experienced in supporting product strategy execution, roadmap delivery, and Agile development for complex, multi-stakeholder solutions. Strong at customer requirement analysis, UAT, sprint execution, product documentation, and go-to-market support. Adept at working closely with engineering, QA, design, and business teams to translate customer needs into scalable product features, improve adoption, and drive measurable product outcomes in regulated and data-intensive environments.

Experience

Codemonk , Bengaluru
Product Manager   *Sep 2022 - Present*

- Transitioned from QA to Product Management, leading cross-functional teams of 8–10 across ML,Frontend, Backend, QA, design, and BA to execute the product lifecycle from requirement handover through development, release, and post-launch optimization.
- Delivered 10+ software products across AI, sustainability, IoT, and biotech domains for B2B clients and government-backed platforms, operating in high-ambiguity, multi-stakeholder environments.
- Owned Agile delivery and sprint execution, planning and facilitating sprint planning, backlog refinement, daily stand-ups, sprint reviews, and retrospectives to ensure delivery predictability and milestone adherence.
- Managed and prioritized product backlogs, sprint scopes, and release plans, partnering with stakeholders to balance business priorities, technical feasibility, delivery timelines, and scope changes.
- Drove release readiness and execution governance, tracking dependencies, managing delivery risks, and coordinating cross-team alignment to ensure predictable outcomes.
- Supported product adoption and continuous improvement by guiding product documentation, onboarding workflows, delivery KPIs, and feedback loops post-release
- **Key Projects:**
  - • AI-Driven Safety Compliance Platform • AI-Driven Music Metadata Enrichment Platform • AI-Based People & Vehicle Tracking Platform • Carbon Footprint Analytics Platform • Multi-Role Program Workflow Platform • Biotech Investor Portal (Govt-backed)

QA Engineer   *Sep 2022 – Dec 2022*

- Performed manual testing across web platforms.
- Built QA documentation, bug reports, and test cases using Jira and Notion.
- Coordinated closely with developers to reduce bug cycle times and improve pre-release QA.

Kool Kanya Pvt. Ltd – Mumbai
QA Engineer   *Jul 2021 – Sep 2022*

- Managed QA cycles for platforms built on Shopify, Thinkific, Ghost CMS, and Tribe community software.
- Created test plans, use cases, and regression scripts for multiple feature rollouts.
- Liaised with content, marketing, and design teams to align feature quality with campaign goals.
- Improved QA documentation and mentored junior testers, enhancing team productivity.
